PROJECTS

Back-To-The-Blog-Site (View Site **) (** View Code **)**

A thoughtfully coded Blog-Site inspired by Back to the Future and built to self-teach React and Redux!

- **Main Stack:** Node.js, MongoDB with mongoose, Express, React, Redux
- **Features:** User authentication with bCrypt.js and JSON web tokens, snappy client-side routing with React-Router, application state-management using Redux and thunk, practical database functionality with a seeder file, a sleek GUI created with React-Bootstrap, and cheeky Back to the Future references

MenuMaker (View Site **) (** View Code **)**

Allows users to browse, create, and save fully formatted recipes in personally constructed menus!

- **Main Stack:** Node.js, Embedded JavaScript, Semantic UI, jQuery, Express, and MongoDB with mongoose
- **Features:** User authentication with passport, implementation of RESTful routing and CRUD actions for recipes and menus, form control based in jQuery for crafting recipes and sending them to menus, and a polished landing page created with Semantic UI

Thought-Pot (View Site **) (** View Code **)**

Created during a 12-hour Hackathon, this site allows users to create positive reflections and save them as a .PNG!

- **Main Stack:** HTML, CSS, JavaScript, jQuery, Bootstrap 4
- **Features:** Advanced DOM manipulation using jQuery, targeted screenshot logic using the html2canvas library, links to every CAPs resource in the CSU system, and minimalist GUI using Bootstrap 4
